

Storage and Handling guide

Storage to maintain the product quality:

1. Store in a cool, dry and ventilated place. Keep away from sunlight and fire sources.
2. Use reasonable care and store away from oxidizing materials.
3. Care in storage to avoid denaturation by the reaction with water or moisture. Once the container is opened, replace the stopper tightly as soon as possible to prevent intrusion of moisture.

More details, please check the Technical data sheet.

Handling:

Customers should review the latest MSDS and label for product safety information, safe handling instructions, personal protective equipment if necessary, and any special storage conditions required for safety. MSDS are available upon request from our sales engineers.

1. Keep away from heat and open flame.
2. Use with adequate ventilation. Use proper ventilation and good housekeeping procedures to avoid accumulation of dust that can form ignitable dust/air mixtures.
3. Keep container closed.
4. Skin and eyes must be protected by use of protective glove and eyeglasses.
5. Do not take internally.
6. Wash after handling, especially before eating, drinking or smoking.
